20 Plaintiff,

21 v.

22

23 GOOGLE, INC., a Delaware corporation,  
24 ORKUT.COM, LLC, a Delaware limited  
liability company, ORKUT  
BUYÜKKÖKTEN, individually,  
and DOES 1-20, inclusive,

25

Defendants.

26 CASE NO. 104 CV 020368

27 **AFFINITY ENGINES, INC.'S  
28 RESPONSES TO GOOGLE, INC'S  
FIRST SET INTERROGATORIES**

29 **PROPOUNDING PARTY: GOOGLE, INC.**

30 **RESPONDING PARTY: AFFINITY ENGINES, INC.**

31 **SET NO.: ONE**

32 Pursuant to California Code of Civil Procedure § 2030(f), plaintiff Affinity  
33 Engines, Inc., ("AEI") hereby submits the following responses and objections to the First Set of  
34 Interrogatories propounded by Google, Inc. ("Google") as follows:

35 **GENERAL OBJECTIONS**

36 AEI objects and incorporates each of the following general objections into its  
37 response to each interrogatory (and to the extent incorporated by Google into each of the  
38 interrogatories, to each of its "Definitions and Instructions") below:

39 DOCSSV1:273743.1

1           1. AEI responds to the interrogatories based on information currently  
2 available to it. Plaintiff's investigation is continuing and ongoing and AEI expressly reserves the  
3 right to revise and/or supplement its responses based on information discovered after the date of  
4 this response. Nothing contained in these responses shall be construed as an admission relative to  
5 the existence or non-existence of any document, or in any way limit AEI's ability to make all uses  
6 at trial or otherwise of this information or any other information or evidence that may be  
7 discovered in the future.

8           2. AEI objects to the "Definitions and Instructions" and the interrogatories to  
9 the extent that they purport to require AEI to respond in any way beyond or not consistent with  
10 that required by the California Code of Civil Procedure, Rules of Court, the local Rules of Court,  
11 and other applicable law, as being overly broad, unduly burdensome, and oppressive.

12           3. AEI further objects to the Interrogatories to the extent that they seek to  
13 elicit information and disclosure of documents subject to and protected by the attorney-client  
14 privilege, the attorney work-product doctrine, and/or any other applicable privilege or immunity.  
15 Nothing contained herein is intended to be or should be construed as a waiver of any privilege,  
16 protection, or immunity.

17           4. AEI further objects to each and every Interrogatory to the extent that it is  
18 not full and complete in and of itself, and to the extent that it contains subparts and/or is  
19 compound, conjunctive, or disjunctive.

20           5. AEI further objects to each and every Interrogatory to the extent that they  
21 seek to elicit information that is protected from disclosure by a right of privacy of under the  
22 relevant provisions of the federal and state Constitutions.

23           6. AEI further objects to each and every Interrogatory to the extent that they  
24 seek confidential, proprietary or commercially sensitive information pertaining to AEI's business  
25 or trade secrets, absent a protective order adequate to protect AEI's rights in such confidential  
26 information and documents.

27           7. AEI further objects to each and every Interrogatory to the extent that they  
28 seek confidential or proprietary information relating to AEI's business, trade secrets and/or

1 economic relationships neither relevant to this case, nor reasonably calculated to lead to the  
2 discovery of admissible evidence. AEI also objects to each Interrogatory to the extent that it calls  
3 for the production of documents containing the trade secrets and proprietary business information  
4 of third parties, which are neither relevant to this case, nor reasonably calculated to lead to the  
5 discovery of admissible evidence.

6           8. AEI further objects to each and every Interrogatory to the extent that they  
7 call for the production of information that is not within AEI's knowledge, possession, custody or  
8 control.

9           9. AEI further objects to the each interrogatory to the extent the discovery  
10 sought is unreasonably cumulative or duplicative, or is obtainable from some other source that is  
11 more convenient, less burdensome, or less expensive and/or the selected method of discovery is  
12 unduly burdensome or expensive, taking into account the needs of the case, the amount in  
13 controversy, and the importance of the issues at stake in the litigation.

14           These General Objections shall be deemed to be incorporated in full into each of  
15 the individual responses set forth below. Subject to and without waiving the foregoing General  
16 Objections, AEI responds specifically to the interrogatories by answering as follows:

17 **INTERROGATORY NO. 1:**

18           Identify with precision and specificity each and every alleged trade secret Affinity  
19 Engines, Inc. contends that Google Inc. misappropriated.

20 **RESPONSE TO INTERROGATORY NO. 1:**

21           AEI objects to this interrogatory as vague and ambiguous because the phrase,  
22 “[i]dentify with precision and specificity each and every alleged trade secret,” has been defined in  
23 the “Instructions of Definitions” of the Interrogatories as seeking “the exact identity, scope,  
24 boundaries, constitutive elements, and content” of the trade secrets. The terms “scope,”  
25 “boundaries,” and “constitutive elements” are vague and ambiguous, and render this interrogatory  
26 overbroad, unduly burdensome, and compound containing multiple subparts. Subject to and  
27 without waiving these objections and the General Objections set forth above, AEI responds as  
28 follows:

1                  See Plaintiff Affinity Engines, Inc.'s Identification of Trade Secrets Pursuant to  
2 C.C.P. § 2019(d) (dated June 10, 2004).

3                  AEI reserves its right to supplement its response to this interrogatory as additional  
4 information becomes available in discovery.

5 **INTERROGATORY NO. 2:**

6                  For each alleged trade secret Affinity Engines, Inc. contends that Google Inc.  
7 misappropriated, identify all Affinity Engines, Inc.'s products that incorporate each such alleged  
8 trade secret, including but not limited to the product version number and date of first sale or first  
9 public disclosure.

10 **RESPONSE TO INTERROGATORY NO. 2:**

11                AEI objects to this interrogatory as vague and ambiguous as to the meaning of  
12 "incorporate," "product version number," and "public disclosure." AEI further objects to this  
13 interrogatory as overbroad and unduly burdensome. AEI further objects to this interrogatory as  
14 compound and containing multiple subparts. AEI further objects to this interrogatory on the  
15 grounds that it is vague as to time. Subject to and without waiving these objections and the  
16 General Objections set forth above, AEI responds as follows:

17                AEI's trade secrets are included in its inCircle™ network relationship software  
18 and its source code, which the defendants misappropriated. The inCircle™ software was first  
19 licensed to Stanford University on or about August 2002 for use with Stanford Alumni  
20 Association website. That website was made available to Stanford alumni on or about January  
21 2003, but that website did not disclose any AEI trade secrets.

22                AEI reserves its right to supplement its response to this interrogatory as additional  
23 information becomes available in discovery.

24 **INTERROGATORY NO. 3:**

25                Identify all measures taken by Affinity Engines, Inc. to preserve the confidentiality  
26 of the alleged trade secrets it contends Google Inc. misappropriated.

27 **RESPONSE TO INTERROGATORY NO. 3:**

28                AEI objects to this interrogatory as vague and ambiguous as to the term

1 "measures." AEI further objects to this interrogatory as overbroad and unduly burdensome.  
2 Subject to and without waiving these objections and the General Objections set forth above, AEI  
3 responds as follows:

4 AEI has undertaken and continues to undertake numerous steps designed to  
5 prevent the unauthorized disclosure of its trade secrets. For example, AEI requires employees  
6 and consultants to sign a "Confidential Information and Invention Assignment Agreement"  
7 which, among other things, requires the employee or consultant to hold AEI's trade secret  
8 information in the strictest confidence, to use such information only for the benefit of AEI, and to  
9 not disclose such information to any third party without prior authorization of AEI. AEI also  
10 requires third parties seeking to pursue any business or research relationship with AEI to sign a  
11 Non-Disclosure Agreement. In addition, printed AEI documents that disclose AEI trade secrets  
12 (or aspects of AEI trade secrets) are marked with confidentiality legends. AEI also restricts  
13 access to its trade secrets to those with a need-to-know basis, e.g., AEI's engineering employees.  
14 AEI computers that have access to AEI trade secrets require a user password. AEI's trade secrets  
15 are kept under lock and key in AEI's offices.

16 As to defendant Orkut Buyukkokten ("Buyukkokten"), he was at all relevant times  
17 in a confidential and fiduciary relationship with AEI and had a duty to use AEI's trade secrets  
18 only for the benefit of AEI, and to neither use nor disclose them for any other purpose without  
19 AEI's prior consent. Defendant Buyukkokten also agreed, in exchange for consideration, to  
20 assign to AEI all of his right, title, and interest in the AEI trade secrets that are the subject of this  
21 lawsuit. *See also* AEI's Response to Interrogatory No. 5, *infra*.

22 AEI reserves its right to supplement its response to this interrogatory as additional  
23 information becomes available in discovery.

24 **INTERROGATORY NO. 4:**

25 Identify all evidence upon which Affinity Engines, Inc. bases its contention that it  
26 owns the alleged trade secrets and/or copyrighted material it contends Google Inc.  
27 misappropriated.

28

1    **RESPONSE TO INTERROGATORY NO. 4:**

2               AEI objects to this interrogatory as compound, confused, and burdensome. AEI  
3 further objects to this interrogatory to the extent it calls for information protected from disclosure  
4 by the attorney-client privilege and work product doctrine. AEI further objects to this  
5 interrogatory as overbroad and unduly burdensome.

6               AEI further objects to the term “copyrighted material” on the grounds that is vague  
7 and ambiguous, and seeks information neither relevant to this action nor reasonably calculated to  
8 lead to the discovery of admissible evidence. The Complaint in this action does not allege any  
9 claim arising under federal copyright law. Accordingly, the response set forth below does not  
10 respond to this interrogatory to the extent it seeks any information relating to “copyrighted  
11 material.”

12              Subject to and without waiving these objections and the General Objections set  
13 forth above, AEI responds as follows:

14              In 2001, Tyler Ziemann and defendant Orkut Buyukkokten developed “Club  
15 Nexus,” a social networking website for use by Stanford undergraduate students. Ziemann and  
16 defendant Buyukkokten were the sole owners of Club Nexus and all related intellectual property  
17 rights, because the website was developed in their spare time with no more than incidental use of  
18 Stanford resources.

19              On or about August 5, 2002, Ziemann and defendant Buyukkokten incorporated  
20 AEI. Ziemann and defendant Buyukkokten were the majority stockholders in AEI, and both  
21 became members of AEI’s Board of Directors. On or about September 11, 2002, approximately  
22 one month after AEI’s incorporation, Ziemann and defendant Buyukkokten formally assigned to  
23 AEI, in writing, all of their right, title and interest in Club Nexus and the network relationship  
24 software and technology they had created. This agreement included, among other things, an  
25 assignment of all rights in any current or future trade secrets related to network relationship  
26 software—including the AEI trade secrets that are the subject of this lawsuit.

27              AEI’s ownership interest was reaffirmed through a subsequent agreement signed  
28 on or about July 9, 2003. All trade secrets developed by defendant Buyukkokten relating to

1 network relationship software, including without limitation the source code for inCircle™ and  
 2 Corcle, belong to AEI pursuant to the agreements he signed with AEI and by virtue of his  
 3 fiduciary relationship and position with AEI.

4 AEI's sole and exclusive ownership of its trade secrets is evidenced by at least the  
 5 following documents: April 20, 2002 Retention Agreement signed by Micah Siegel, Orkut  
 6 Buyukkokten, and Tyler Ziemann; September 11, 2002 Amendment to Retention Agreement  
 7 signed by Micah Siegel, Orkut Buyukkokten, and Tyler Ziemann; September 11, 2002 Stock  
 8 Purchase Agreement signed by Orkut Buyukkokten (including all exhibits and attachments); July  
 9 9, 2003 agreement signed by Orkut Buyukkokten; August 30, 2002 Agreement between AEI and  
 10 the Board of Trustees of Stanford University; and June 9, 2004 Letter from Katherine Ku to AEI  
 11 regarding the August 30, 2002 Agreement.

12 AEI reserves its right to supplement its response to this interrogatory as additional  
 13 information becomes available in discovery.

14 **INTERROGATORY NO. 5:**

15 Identify all evidence upon which Affinity Engines, Inc. bases its contention that  
 16 Orkut Buyukkokten had a duty to maintain the alleged secrecy of the alleged trade secrets  
 17 Affinity Engines, Inc. contends that Google Inc. misappropriated.

18 **RESPONSE TO INTERROGATORY NO. 5:**

19 AEI objects to this interrogatory to the extent it calls for a legal conclusion or legal  
 20 analysis. AEI further objects to this interrogatory as premature in that discovery in this action has  
 21 just begun. No documents have been produced in discovery, no testimony has been taken, no  
 22 protective order has been entered, and the defendants have refused to provide discovery pending  
 23 their purported challenge to AEI's trade secret disclosure. AEI reserves its right to rely, at trial  
 24 and otherwise, on any evidence subsequently adduced in discovery in this action.

25 AEI further objects to this interrogatory to the extent it calls for information  
 26 protected from disclosure by the attorney-client privilege and work product doctrine. AEI further  
 27 objects to this interrogatory as overbroad and unduly burdensome. Subject to and without  
 28 waiving these objections and the General Objections set forth above, AEI responds as follows:

1           Defendant Orkut Buyukkokten was a co-founder of AEI, a member of the Board  
2 of Directors of AEI, a shareholder in AEI, an AEI employee, and an integral member of AEI's  
3 inCircle™ development team. By virtue of these positions and other responsibilities he  
4 undertook for AEI, defendant Buyukkokten was in a confidential and fiduciary relationship with  
5 AEI and was required (and is still required) to use AEI's trade secrets only for the benefit of AEI,  
6 and to neither use nor disclose them for any other purpose without AEI's prior consent.

7           Defendant Buyukkokten assigned, in writing, all of his rights, title and interest in  
8 the AEI trade secrets that are at issue in this lawsuit, as explained in AEI's Response to  
9 Interrogatory No. 4, *supra*. Defendant Buyukkokten received consideration for this assignment in  
10 the form of stock and rights in AEI. By virtue of this assignment, defendant Buyukkokten  
11 promised to refrain from any act that would harm, disrupt, damage or diminish AEI's trade  
12 secrets, or the value of AEI's trade secrets.

13           Defendant Buyukkokten also agreed not to use or disclose these trade secrets in his  
14 employment with Google. Upon joining Google, defendant Buyukkokten received an  
15 "Employment, Confidential Information and Invention Assignment Agreement" that required,  
16 among other things, that Buyukkokten complete an attached "List of Prior Inventions and  
17 Original Works of Authorship." On or about May 2002, defendant Buyukkokten provided the  
18 agreement and attached list of prior inventions to AEI. AEI in turn furnished Buyukkokten with  
19 the completed list of prior inventions, which detailed the network relationship software and  
20 technology that Buyukkokten had assigned to AEI. When AEI provided the list of prior  
21 inventions to defendant Buyukkokten, Buyukkokten assured AEI that his employment with  
22 Google would not interfere with his responsibilities to AEI, and further assured AEI that he  
23 would not nor would he work on any social networking projects while at Google. Buyukkokten  
24 informed AEI that he had signed Google's employment agreement with the list of prior  
25 inventions prepared attached to it, expressly reserving for the benefit of AEI all rights he had to  
26 any social networking trade secrets and source code he had created or would create in the future  
27 for AEI.

28           AEI reserves its right to supplement its response to this interrogatory as additional  
DOCSSV1:273743.1

1 information becomes available in discovery.

2 **INTERROGATORY NO. 6:**

3 Identify all evidence that supports any contention by Affinity Engines, Inc. that  
4 each of its alleged trade secrets allegedly misappropriated by Google Inc. were not in the public  
5 domain at the time of any alleged misappropriation by Google Inc.

6 **RESPONSE TO INTERROGATORY NO. 6:**

7 AEI objects to this interrogatory as vague and ambiguous as to the term "public  
8 domain." AEI further objects to this interrogatory as overbroad and unduly burdensome, as it  
9 essentially requests that AEI prove a negative fact. AEI objects to this interrogatory to the extent  
10 it calls for information protected from disclosure by the attorney-client privilege and work  
11 product doctrine. Subject to and without waiving these objections and the General Objections set  
12 forth above, AEI responds as follows:

13 AEI undertook numerous steps to maintain the confidentiality of its trade secret  
14 information, as detailed in AEI's Response to Interrogatory No. 3, *supra*. In addition, defendant  
15 Buyukkokten had an obligation to maintain the confidentiality of AEI's trade secrets, as described  
16 in AEI's Response to Interrogatory No. 5, *supra*. The confidential nature of AEI's trade secrets is  
17 also shown by the lack of any evidence of public disclosure.

18 AEI reserves its right to supplement its response to this interrogatory as additional  
19 information becomes available in discovery.

20 **INTERROGATORY NO. 7:**

21 Identify all evidence that supports any contention by Affinity Engines, Inc. that  
22 Orkut Buyukkokten and/or Google Inc. misappropriated any alleged Affinity Engines, Inc. trade  
23 secret, including but not limited to a description of the precise manner in which each alleged  
24 secret was allegedly misappropriated.

25 **RESPONSE TO INTERROGATORY NO. 7:**

26 AEI objects to this interrogatory as premature in that discovery in this action has  
27 just begun. No documents have been produced in discovery, no testimony has been taken, no  
28 protective order has been entered, no trial date has been set, and the defendants have refused to

1 provide discovery pending their purported challenge to AEI's trade secret disclosure. Moreover,  
2 evidence relating to "the precise manner" in which AEI's trade secrets were misappropriated by  
3 the defendants is in the exclusive possession of the defendants. AEI reserves its right to rely, at  
4 trial and otherwise, on any evidence subsequently adduced in discovery in this action.

5 AEI further objects to this interrogatory to the extent it calls for information  
6 protected from disclosure by the attorney-client privilege and work product doctrine. AEI further  
7 objects to this interrogatory as overbroad and unduly burdensome. AEI further objects to this  
8 interrogatory as compound and containing multiple subparts. AEI further objects to this request  
9 to the extent to the extent it seeks premature expert testimony protected by C.C.P. § 2034.  
10 Subject to and without waiving these objections and the General Objections set forth above, AEI  
11 responds as follows:

12 In or about the summer of 2003 and without authorization from AEI, defendant  
13 Buyukkokten and Clayton Jones began to secretly modify the inCircle™ software to launch a  
14 competing website known as "Corcle.com." In August 2003, AEI discovered that defendant  
15 Buyukkokten had launched the Corcle.com website. AEI objected, reminding Buyukkokten that  
16 he had assigned all of his rights to network relationship software to AEI. (All trade secrets  
17 relating to inCircle™ and Corcle belong to AEI, as detailed in AEI's Response to Interrogatory  
18 No. 4, *supra*.) AEI further reminded defendant Buyukkokten that he owed a fiduciary obligation  
19 to AEI as a member of its Board of Directors not to compete with AEI or misuse its trade secrets.  
20 Acknowledging AEI's rights to inCircle™ and Corcle.com, Buyukkokten shut down the  
21 Corcle.com website in response to AEI demands in or about August 2003. Buyukkokten gave  
22 AEI assurances that he would stop supporting or working on Corcle.com. AEI believes, however,  
23 that Buyukkokten continued to secretly develop Corcle.com and by using AEI's trade secret,  
24 confidential, and proprietary software to facilitate and expedite its development.

25 During this timeframe, Google expressed an interest in developing a social  
26 networking website, and began to evaluate whether it should acquire Friendster, Inc.  
27 ("Friendster") or another social networking company. On information and belief, Google knew  
28 that defendant Buyukkokten had developed two other social networking websites, Club Nexus

1 and inCircle™, and asked Buyukkokten to evaluate Friendster as a potential acquisition candidate  
2 for Google. In or about September 2003, defendant Buyukkokten confirmed to AEI that he was  
3 involved in evaluating Friendster for Google. On information and belief, in or about October  
4 2003 Google made an offer to acquire Friendster for \$30 million, but Friendster declined  
5 Google's offer. Having lost the opportunity to acquire Friendster, Google instead turned to  
6 defendant Buyukkokten to develop a social networking website for Google. This website later  
7 became known as Orkut.com.

8 AEI believes that defendant Google improperly obtained and used the source code  
9 for inCircle™ and Corcle from defendant Buyukkokten between the middle of 2003 and early  
10 2004. AEI believes that defendants Google and Buyukkokten used the inCircle™ and Corcle  
11 source code to develop Google's social networking website, <http://www.orkut.com>, which was  
12 launched on or about January 22, 2004. AEI believes that at all relevant times, Google knew of  
13 defendant Buyukkokten's relationship with AEI, knew about AEI's inCircle™ network  
14 relationship software and its earlier Club Nexus website, and knew of defendant Buyukkokten's  
15 obligations to AEI. Although AEI has not yet obtained the source code for the Orkut.com  
16 website, AEI has uncovered several unique software "bugs," or unique idiosyncratic software  
17 behaviors, in AEI's inCircle™ product that were also present in Orkut.com. The presence of  
18 these "bugs" in both programs is highly indicative of a common source code.

19 The misappropriation of AEI's trade secrets by the defendants is supported by at  
20 least the following evidence: the 34 CD-ROMs retained by defendant Buyukkokten following his  
21 resignation from AEI, the contents of the hard disk drive defendant Buyukkokten delivered to  
22 Wilson, Sonsini, Goodrich & Rosati on or about March 16, 2004, the source code and other files  
23 for inCircle™, Corcle, and Club Nexus, and the orkut.com website and source code.

24 The persons involved and with knowledge of facts relevant to this interrogatory  
25 include Sergey Brin, Orkut Buyukkokten, Clayton Jones, and Larry Page.

26 AEI reserves its right to supplement its response to this interrogatory as additional  
27 information becomes available in discovery.  
28

1       **INTERROGATORY NO. 8:**

2                  Identify all evidence that supports any contention by Affinity Engines, Inc. that it  
3                  suffered damages and/or other injury as a result of alleged wrongdoing in its Complaint in this  
4                  action.

5       **RESPONSE TO INTERROGATORY NO. 8:**

6                  AEI objects to this interrogatory as premature in that discovery in this action has  
7                  just begun. No documents have been produced in discovery, no testimony has been taken, no  
8                  protective order has been entered, no trial date has been set, no damages experts have been  
9                  designated, and the defendants have refused to provide discovery pending their purported  
10                 challenge to AEI's trade secret disclosure. AEI reserves its right to rely, at trial and otherwise, on  
11                 any evidence subsequently adduced in discovery in this action. AEI further objects to this request  
12                 to the extent to the extent it seeks premature expert testimony protected by C.C.P. § 2034.

13                 Subject to and without waiving these objections and the General Objections set  
14                 forth above, AEI responds as follows:

15                 AEI has suffered injury from the defendants' wrongful conduct. This injury  
16                 includes the defendants' unlawful misappropriation of AEI's trade secret, confidential, and  
17                 proprietary information, and the breach of defendant Buyukkokten's fiduciary, contractual, and  
18                 other obligations to AEI. Through the defendants' wrongful conduct as alleged in the Complaint,  
19                 defendant Google has reaped a substantial advantage and benefited because it did not need to  
20                 spend the millions of dollars it would have required for Google to legitimately acquire or develop  
21                 the technology to enter into the social networking business. Defendant Google avoided the time  
22                 and expense required to develop its own network relationship software by relying on defendant  
23                 Buyukkokten, knowing he had access to AEI trade secret, confidential, and proprietary  
24                 information. This "free" head start gave Google an early and critical entry into the social  
25                 networking market, causing tremendous harm and injury to AEI and threatening the viability of  
26                 its business. Furthermore, the defendants' wrongful use and exploitation of AEI's trade secret,  
27                 confidential, and proprietary information allowed the defendants to launch a website in  
28                 competition with inCircle™, causing further injury to AEI.

1           As a result of the defendants' wrongful conduct, AEI seeks monetary relief in the  
2 form of compensatory and punitive damages, enhanced damages under the Uniform Trade Secret  
3 Act, unjust enrichment (e.g. an accounting, restitution, and disgorgement of profits), costs of suit  
4 including attorneys' fees, and pre- and post-judgment interest.

5           Persons with knowledge of the injuries AEI sustained as a result of the defendants'  
6 conduct include Brian Samuels, Micah Siegel, and Tyler Ziemann.

7           AEI reserves its right to supplement its response to this interrogatory as  
8 information becomes available during discovery.

9 **INTERROGATORY NO. 9:**

10           Describe the circumstances of each disclosure by Affinity Engines, Inc. to a third  
11 party of any Affinity Engines, Inc.'s trade secret that Affinity Engines, Inc. contends Google Inc.  
12 misappropriated, including, but not limited to, describing the date of each such disclosure, the  
13 identities of the third parties and individuals involved, all individuals with knowledge of such  
14 facts, and all documents relating to each disclosure.

15 **RESPONSE TO INTERROGATORY NO. 9:**

16           AEI objects to this interrogatory on the grounds that it is compound and contains  
17 multiple subparts. AEI further objects to this interrogatory to the extent it calls for information  
18 protected from disclosure by the attorney-client privilege and work product doctrine. AEI further  
19 objects to this interrogatory as overbroad and unduly burdensome. Subject to and without  
20 waiving these objections and the General Objections set forth above, AEI responds as follows:

21           AEI's source code was provided to Care2.com, Inc. pursuant to a non-disclosure  
22 agreement dated January 19, 2004. The persons involved and with knowledge include Raymond  
23 Paynter, Brian Samuels, Micah Siegel, and Tyler Ziemann.

24           AEI reserves its right to supplement its response to this interrogatory as  
25 information becomes available during discovery.

26 **INTERROGATORY NO. 10:**

27           Identify all evidence upon which Affinity Engines, Inc. bases its contention, for  
28 each alleged Affinity Engines, Inc.'s trade secret, that each such alleged secret was secret at the  
DOCSSV1:273743.1

1 time of the alleged misappropriation by Google Inc.

2 **RESPONSE TO INTERROGATORY NO. 10:**

3 AEI objects to this interrogatory to the extent it calls for information protected  
4 from disclosure by the attorney-client privilege and work product doctrine. AEI further objects to  
5 this interrogatory as overbroad and unduly burdensome. Subject to and without waiving these  
6 objections and the General Objections set forth above, AEI responds as follows:

7 See AEI's Response to Interrogatory Nos. 3 and 6, *supra*.

8 AEI reserves its right to supplement its response to this interrogatory as additional  
9 information becomes available in discovery.

10 **INTERROGATORY NO. 11:**

11 Identify all evidence upon which Affinity Engines, Inc. bases its contention that  
12 Google, Inc. improperly obtained each alleged Affinity Engines, Inc.'s trade secret, including but  
13 not limited to the date and circumstances pursuant to which Affinity Engines, Inc. claims Google,  
14 Inc. improperly obtained each alleged trade secret, the identities of the individuals involved, and  
15 all individuals with knowledge of such facts and documents supporting the contention.

16 **RESPONSE TO INTERROGATORY NO. 11:**

17 AEI objects to this interrogatory as premature in that discovery in this action has  
18 just begun. No documents have been produced in discovery, no testimony has been taken, no  
19 protective order has been entered, no trial date has been set, and the defendants have refused to  
20 provide discovery pending their purported challenge to AEI's trade secret disclosure. Much of  
21 the evidence requested by this interrogatory is in the exclusive possession of the defendants. AEI  
22 reserves its right to rely, at trial and otherwise, on any evidence subsequently adduced in  
23 discovery in this action.

24 AEI further objects to this interrogatory to the extent it calls for information  
25 protected from disclosure by the attorney-client privilege and work product doctrine. AEI further  
26 objects to this interrogatory as overbroad and unduly burdensome. AEI further objects to this  
27 interrogatory as compound and containing multiple subparts. Subject to and without waiving  
28 these objections and the General Objections set forth above, AEI responds as follows:

1           See AEI's Response to Interrogatory No. 7, *supra*.

2           AEI reserves its right to supplement its response to this interrogatory as additional  
3 information becomes available in discovery.

4 **INTERROGATORY NO. 12:**

5           Identify all evidence upon which Affinity Engines, Inc. bases its contention that  
6 Google, Inc. put alleged Affinity Engines, Inc. trade secrets to use, including but not limited to all  
7 individuals with knowledge of such facts and documents supporting the contention.

8 **RESPONSE TO INTERROGATORY NO. 12:**

9           AEI objects to this interrogatory as premature in that discovery in this action has  
10 just begun. No documents have been produced in discovery, no testimony has been taken, no  
11 protective order has been entered, no trial date has been set, and the defendants have refused to  
12 provide discovery pending their purported challenge to AEI's trade secret disclosure. Much of  
13 the evidence requested by this interrogatory is in the exclusive possession of the defendants. AEI  
14 reserves its right to rely, at trial and otherwise, on any evidence subsequently adduced in  
15 discovery in this action. AEI further objects to this request to the extent to the extent it seeks  
16 premature expert testimony protected by C.C.P. § 2034.

17           AEI further objects to this interrogatory to the extent it calls for information  
18 protected from disclosure by the attorney-client privilege and work product doctrine. AEI further  
19 objects to this interrogatory as overbroad and unduly burdensome. AEI further objects to this  
20 interrogatory as compound and containing multiple subparts. Subject to and without waiving  
21 these objections and the General Objections set forth above, AEI responds as follows:

22           See AEI's Response to Interrogatory No. 7, *supra*.

23           AEI reserves its right to supplement its response to this interrogatory as additional  
24 information becomes available in discovery.

25 **INTERROGATORY NO. 13:**

26           Identify all evidence upon which Affinity Engines, Inc. bases its contention that it  
27 suffered injury and/or damages from Google Inc.'s alleged misappropriation of each alleged  
28 Affinity Engines, Inc.'s trade secret, including but not limited to all individuals with knowledge

1 of such facts and documents supporting the contention.

2 **RESPONSE TO INTERROGATORY NO. 13:**

3 AEI objects to this interrogatory as premature in that discovery in this action has  
4 just begun. No documents have been produced in discovery, no testimony has been taken, no  
5 protective order has been entered, no trial date has been set, no damages experts have been  
6 designated, and the defendants have refused to provide discovery pending their purported  
7 challenge to AEI's trade secret disclosure. AEI reserves its right to rely, at trial and otherwise, on  
8 any evidence subsequently adduced in discovery in this action. AEI further objects to this request  
9 to the extent to the extent it seeks premature expert testimony protected by C.C.P. § 2034.  
10 Subject to and without waiving these objections and the General Objections set forth above, AEI  
11 responds as follows:

12 See AEI's Response to Interrogatory No. 8, *supra*.

13 AEI reserves its right to supplement its response to this interrogatory as additional  
14 information becomes available in discovery.

15 **INTERROGATORY NO. 14:**

16 Identify every public domain source, including but not limited to competitors'  
17 datasheets and website publications, textbooks, and trade show materials, that discloses or  
18 encompasses any of the alleged Affinity Engines, Inc.'s trade secrets Affinity Engines, Inc.  
19 contends Google, Inc. misappropriated.

20 **RESPONSE TO INTERROGATORY NO. 14:**

21 AEI objects to this interrogatory as vague and ambiguous as to the terms "public  
22 domain," "datasheets," "trade show materials," and "encompasses." AEI further objects to this  
23 interrogatory as overbroad and unduly burdensome. AEI further objects to this interrogatory as  
24 compound and containing multiple subparts. Subject to and without waiving these objections and  
25 the General Objections set forth above, AEI responds as follows:

26 AEI is aware of no publicly-available materials that disclose its trade secrets.

27 **INTERROGATORY NO. 15:**

28 Identify all evidence upon which Affinity Engines, Inc. bases its contention that

1 Affinity Engines, Inc. is the owner of the 34 CD-ROMs cited in the Eighth Cause of Action in the  
 2 Complaint.

3 **RESPONSE TO INTERROGATORY NO. 15:**

4 AEI objects to this interrogatory to the extent it calls for information protected  
 5 from disclosure by the attorney-client privilege and work product doctrine. AEI further objects to  
 6 this interrogatory as overbroad and unduly burdensome. Subject to and without waiving these  
 7 objections and the General Objections set forth above, AEI responds as follows:

8 On or about September 25, 2003, after it learned of defendant Buyukkokten's  
 9 involvement in evaluating potential social networking acquisitions for Google, AEI sent an email  
 10 to defendant Buyukkokten which included the following request:

11 Given all of the recent news/activity, I'm going to need you to  
 12 delete from your computer all inCircle and Club Nexus data. In  
 13 addition, I will need you to hand over all of your Club Nexus and  
 14 inCircle CDs as they are company property. I will be sending you  
 a legal form to sign, certifying that you have done as such.

15 Later that same day, defendant Buyukkokten responded to AEI's e-mail and refused to return the  
 16 CDs, despite the fact that the materials were AEI's property. Buyukkokten told AEI to "stop  
 17 being so paranoid. We are on the same side." Defendant Buyukkokten did not dispute AEI's  
 18 contention the 34 CD-ROMs were the property of AEI, acknowledging AEI's ownership of them.

19 In addition, the 34 CD-ROMs identified in the Complaint contain trade secret and  
 20 confidential information, including but not limited to trade secrets pertaining to AEI's inCircle™  
 21 network relationship software. This trade secret and confidential information belongs to AEI, as  
 detailed in AEI's Response to Interrogatory No. 4, *supra*.

22 AEI reserves its right to supplement its response to this interrogatory as additional  
 23 information becomes available in discovery.

24 **INTERROGATORY NO. 16:**

25 Do you contend that Google Inc. has in any way infringed any copyright owned by  
 26 Affinity Engines, Inc.?

27 **RESPONSE TO INTERROGATORY NO. 16:**

28 AEI objects to this interrogatory on the ground that it seeks information neither

1 relevant to this action nor reasonably calculated to lead to the discovery of admissible evidence.

2 The Complaint in this action does not allege any claim arising under federal copyright law.

3 **INTERROGATORY NO. 17:**

4 If the answer to Number 16 is affirmative, identify all evidence that supports your  
5 contention.

6 **RESPONSE TO INTERROGATORY NO. 17:**

7 AEI objects to this interrogatory as not full and complete in and of itself. AEI  
8 further objects to this interrogatory on the ground that it seeks information neither relevant to this  
9 action nor reasonably calculated to lead to the discovery of admissible evidence. *See Response to*  
10 *Interrogatory No. 16, supra.*
